i-gel™ O2 Resus Pack
Three things in one pack, one less thing to think about

Airway Management • Airway Devices
In emergency medicine, you need equipment that’s easy, rapid and reliable to use. The i-gel O₂ Resus Pack contains everything you need to prepare, insert and secure the i-gel O₂ quickly and efficiently: an i-gel O₂ supraglottic airway, a sachet of lubricant and an airway support strap.

The i-gel O₂ incorporates a supplementary oxygen port and an integral hook ring for securing of the airway support strap.

The i-gel O₂ has been designed to facilitate ventilation as part of standard resuscitation protocols, such as those designated by the European Resuscitation Council (ERC) and the American Heart Association (AHA). However, the i-gel O₂ incorporates a supplementary oxygen port, so that it can also be used for the delivery of passive oxygenation, or Passive Airway Management (PAM™), as part of an appropriate CardioCerebral Resuscitation (CCR) protocol.

Airway innovation since 2007

i-gel is the innovative second generation supraglottic airway device from Intersurgical launched in 2007. The first major development since the laryngeal mask airway, the i-gel changed the face of airway management and is now widely used in anesthesia and resuscitation around the world.

The non-inflating cuff
The i-gel gets its name from the innovative soft, gel-like material from which it is made. It is the innovative application of this material that has enabled the development of a unique non-inflating cuff. This means there is no need for cuff deflation prior to insertion and no cuff inflation after placement in order to secure a seal, which shortens and simplifies the preparation and insertion procedure.

Insertion
The i-gel O₂ is incredibly easy to use. Insertion is rapid and can normally be achieved in less than 5 seconds, by a proficient user. The simplicity of i-gel O₂ means the insertion technique is instinctive, reliable and does not require or benefit from the insertion of fingers or thumbs into the patient’s mouth.

Fixation
The i-gel O₂ Resus Pack includes a specially designed airway support strap for securing the i-gel O₂ in position. Fixation is easily achieved by sliding the strap under the patient’s neck and securing it in place with the hook ring on the collar of the i-gel O₂. This makes it ideal for use where adhesive tape is unsuitable, such as on patients with facial hair.

i-gel O₂ Resus Pack

15mm connector
Reliable connection to any standard catheter mount or connection

Supplementary oxygen port
For the administration of passive oxygenation as a component of cardiocerebral resuscitation (CCR)

Proximal end of gastric channel

Gastric channel
Enhances patient safety by providing a mechanism for the management of regurgitant fluid

Color coded hook ring
To secure the i-gel O₂ in position with the airway support strap

Integral bite block
Reduces the possibility of airway channel occlusion

Clearly displayed product information
For quick easy reference. Includes confirmation of size and weight guidance

Buccal cavity stabilizer
Aids insertion and eliminates the potential for rotation

Position guide
(adult sizes only)

Epiglottic rest
Reduces the possibility of epiglottis ‘down folding’ and airway obstruction

The i-gel O₂ Resus Pack is available in 3 adult sizes and includes:
- i-gel O₂ supraglottic airway
- Sachet of lubricant – for quick and easy lubrication of the i-gel O₂ prior to insertion
- Airway support strap – to secure the i-gel O₂ in position

Gastric channel
Enhances patient safety by providing a mechanism for the management of regurgitant fluid

Non-inflating cuff
Eliminates the need for cuff inflation after insertion, allowing easy and rapid insertion

Distal end of gastric channel
Ordering information

The i-gel O₂ Resus Pack contains an i-gel O₂, with an easily removable inner tray, containing a sachet of lubricant and an airway support strap all packaged in a specially designed clear, sterile, rigid pack. This unique design ensures protection of the contents, both in transit and in storage. The i-gel O₂ has a color coded hook ring to allow quick and easy identification of size. The i-gel O₂ Resus Pack is available in three adult sizes.
